Исх. №1-10/07/20 от 10.07.2020 г.

**Reference Letter - Feedback  
on the use of the Transport Information Center at the  
Yaroslavsky train station (Moscow) equipped with a sanitary module  
(supplied by individual entrepreneur M.I. Timchenko, TauRus Group, Moscow)**

In 2019, at our company's request and for Russian Railways, personnel of individual entrepreneur M.I. Timchenko built and commissioned a Transport Information Center (TIC) at the Yaroslavsky train station (Moscow). The TIC is used to sell tickets and provide information support to passengers. The TIC features a prefabricated frame and a sanitary module equipped with a vacuum toilet system (VTS) that requires no connection to the city's utility lines, except for the electrical grid.

TIC's dimensions: 3,960 x 10,800 x 3,650 mm (WLH).

TIC's appearance:

The TIC building structure and commissioning were conducted by individual entrepreneur M.I. Timchenko pursuant to high quality standards and on time.

The VTS is a cabin with a stainless steel vacuum bowl and certain sanitary ware (hand wash sink with an automatic faucet, liquid soap dispenser, water heater, towel holder, clothes hanger). The VTS' service compartment includes a compressor, clean and waste water tanks, PLC-based control system.

The VTS advantages include low clean water consumption, no odors in quite a small room and independence from utility lines which ensures good serviceability of the facility and convenience for TIC personnel and passengers.

Having operated the TIC for some time, our company can recommend using such facilities equipped with VTS and cooperating with individual entrepreneur M.I. Timchenko.
